# How does education affect income?

**Advanced education and continued training opens up career opportunities and usually leads to higher income.**

**The more you learn, the more  
you earn**

**96% of employers said continuing  
education improves job performance and  
has a direct correlation on pay scale.**

**There are classes to take for  
creativity and personal  
enrichment, and classes to help  
further your career.**

**What might a foreign language  
class help with?**

**Learning a new language could be valuable to you in your personal relationships.**

**It also may give you a big boost in your job search. Many employers recruit workers who are bilingual.**

# Education Matters

	<b>AVG Income</b>
<b>Degree</b>	
<b>High School Diploma</b>	<b>\$36,600</b>
<b>Bachelor Degree</b>	<b>\$59,600</b>
<b>Higher education</b>	<b>\$69,700</b>
<b>Skilled trade jobs</b>	<b>\$68,000</b>

# What is your educational debt?

## Do you think it was worth it?

Your minimum payment for education today will go towards paying off your debt. You may choose additional education at an extra cost.

# School Expenses

Choosing to pay for an education will most likely mean you will have additional expenses as well.

School expenses will vary but can include room and board for college, books, supplies and fees for extra curricular activities, clubs and sports.

Some school supplies are required spending, so it is important to plan for that in your budget.

# Game time!

Let's play career outburst

- Write as many potential careers as you can think of for the given industry
