

Communication: TV, Streaming, Phone, and Internet

Do you have phone service, cable TV, satellite TV, streaming service, and/or internet service at home now?

Do you think you will need a land line and cell phone in the future?

When choosing a cellphone for yourself or your family there are several things to consider:

- **Single or Family plan**
 - **Contract length**
 - **Data plans**

Data plans on your phone are needed for:

- **Social Media**
 - **Apps**
- **Streaming (music and videos)**

How many hours each day do you spend on screen time, watching TV or using the internet?

What are the different delivery methods for TV programming?

Cable TV

Satellite

**Streaming Services such as
Netflix, Hulu, Apple etc.**

When you use the internet, are you using it more for entertainment, schoolwork, or business?

Your answer will determine what type of plan you need.

What is Bundling?

Many providers will bundle your internet, phone service and tv viewing into one price, which should save you money.
